ArtWrap™ Two Minute Canvas System

Folding the ArtWrap board stretches the canvas taught

Corner folds are quick, neat and flat

Rigid, lightweight and child safe

Canvas surface won't sag

Great results from your printer

Your 17" printer lets you produce finished canvas panels 8 x 8", 8 x 12", 12 x 12", 12 x 16".
A 24" printer will do all those, plus 16x20" and 20 x 30".

Click on QuickPro software for ArtWrap™ canvas

QuickPro software is free-to-use and works with almost any image file, max 40mb. Follow on-screen instructions. These let you choose border styles.
  Upload image file from any device. If you wish, process through Photoshop or similar for printer profiling. Save file as a JPG.

The ArtWrap™ concept features a flat sheet of high quality rigid fluted board, precision die-cut to an extremely clever design. Adhesive tape is ready-applied in all the right places.
  Process the photo through QuickPro Canvas Software which offers lots of border options. Canvas or paper is printed out with trim lines. Then position onto the ArtWrap board and secure it with staples all round.
  After trimming off the corners, the board is folded up, tucking in the corners as you go. This action stretches the canvas taught. Everything clicks into place and the task takes about two minutes.
  The 2mm thick black backing board is stuck in place and the whole becomes very rigid yet light. Hang it on the wall with a pin, or add style and value with a simple Lion tray frame moulding.

Why use ArtWrap?

- Canvas surface won't sag
- Corner folds are quick, neat and flat
- Childsafe yet strong enough to mail
- No tools, glues, machines or heat needed - only a stapler and scissors
- QuickPro software is free to use
- Global patents pending
- 38mm edge suits many Lion tray frame mouldings

Many choices of border style with QuickPro software
